

Powerful and Highly integrated Drive Board for Printing

EPSON
EXCEED YOUR VISION

Print head

- 4-way waveform independent configuration effectively adapts to more ink
- In-line adjustment of the waveform voltage effectively reduces chromatic aberration
- TICKLING function protects the print-head from clogging
- Print-head temperature monitoring improve the service life of the nozzle

for I1600

for I3200

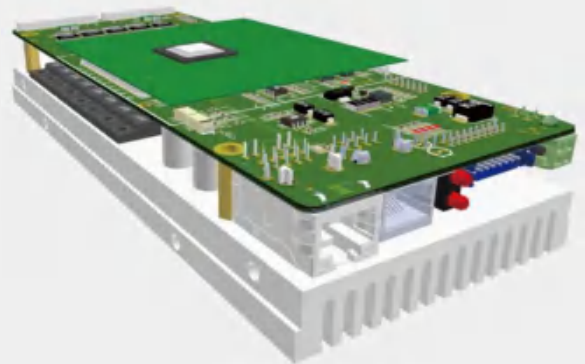

Function

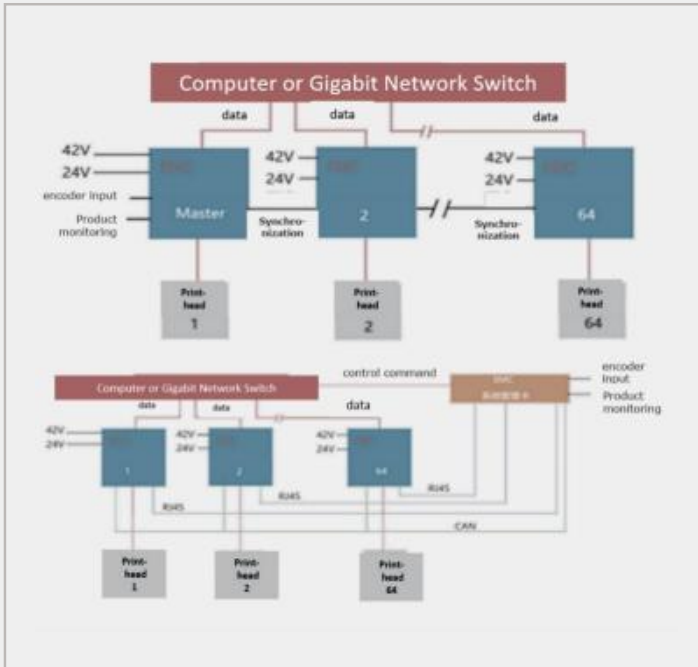

- Support firmware upgrade
- System self-test function
- Built -in 1g large memory space
- Support preloading, variable data printing modes

Connection

- connect directly to the computer or switch via RJ45
- External trigger, internal trigger, multiple trigger modes
- Provide I / O, can, 485 and other communication modes
- provide a complete API interface to meet the needs of secondary development

for S3200

- Modular components, can be easily maintained and expanded
- A network segment support up to 64 print-head
- TICKLING function protects the print-head from clogging
- Maximum Performance
- Provide with applications to meet customer demand

Epson打印头	Product	Model type	Size(mm)
I3200	Print control card	PDC-EI3200	190 X 80 X 51
I1600	Print control card	PDC-EI1600	190 X 80 X 51
S3200	Print control card	PDC-ES3200	190 X 80 X 51
